# Global Certification

A warm, intimate photograph of a man and a woman smiling and petting a white dog. The man, with a beard and wearing a red and white striped shirt, is looking down at the dog. The woman, with long blonde hair, is leaning in from the left, her hand resting on the man's shoulder. The dog is a fluffy white breed, possibly a Golden Retriever, and is wearing a red collar. The scene is bathed in soft, golden light, suggesting a sunny day indoors. The background is slightly blurred, showing a wooden cabinet and a lamp.

# About us

## Mission

Deliver pet food of choices for your companions. We are the manufacturer that pet parents can rely on.

# About us

## Vision

To be a top five pet food OEM manufacturer in Asia Pacific by 2027.

## ESSENTIAL BENEFITS

Zinc amino acid supports healthy skin and coat and improves immune system. It also aids in cell division and replication of DNA and RNA. The ingredient supports eyesight and boosts cognitive function including learning and memory, Zinc amino acid also involves in production of hormones.

SPINACH consists of large amounts of vitamins A, B, C, and K. As well as iron, antioxidants and beta-carotene which stimulate the digestive tract.

Pumpkin promotes healthy digestive system. It also contains fibers and vitamin A, which soothes digestive tracts and any sort of digestive upset your pet may be experiencing.

DHA has an important role in the development of the brain and retina in cats. It also reduces the incidence of allergies. DHA has anti-inflammatory properties for the respiratory tract. It helps relieve seasonal allergy symptoms, strengthens joint health and reduce the risk of developing kidney disease.

VITAMIN B COMPLEX helps to maintain a healthy metabolism and helps with the absorption of essential nutrients, such as iron. It also helps with the breakdown of fat and protein, as well as with cognitive functioning.

Chicken Protein Hydrolyzate is the best absorbed protein for body development and suitable for sensitive pets with allergy avoidance properties.

Fructo-oligosaccharides (Prebiotic) improves immune protection, digestive health and excretory system.

Lysine strengthens the immune system of your puppy.

The purpose of Vitamin D3 is to maintain balance including both calcium and phosphorus homeostasis.
